Duties: Photoshop, ASP, MySQL, C#, HTML, CSS, MS ACCESS, VISUAL STUDIO
Working on in-house Software applications and Airline-based Web sites/applications.

About Me//

You can see from my skill set that I am not restrained to any one area, I enjoy them all. I love to be involved on all levels, from pioneering new ideas to getting fulfilment from mocking up some page designs. I believe in hard work and dedication I use this philosophy with everything I do in life.

I would say my heart lies with design. From as young as I can remember I have been sketching. Also I have always been interested in computer games and have relished in the evolution of this technology.

I have been able to adapt myself to many skills. I constantly surprise myself with the speed of learning new web/software development technologies, and now have added confidence when facing a new skills to learn.

I am a keen sportsman and stay very active and healthy. I have played competitive sports my entire life and have been playing semi-professional football (soccer) for the past 3 years. I have a good social life as I meet lots of people through my career and hobbies.
